ABOUT ME

Starting my MSc in Software Engineering at Aalborg University (AAU) this year, after completing my BSc in Software Technology at DTU, I am eager to take on a role where I can work with real-world systems at scale, deepen my technical expertise, and contribute to building high-quality, impactful products. I enjoy solving complex problems, learning from experienced colleagues, and collaborating across teams to deliver reliable and user-focused solutions. I thrive in environments that value curiosity, continuous improvement, and teamwork.

Outside of work, I enjoy bouldering, brewing mead and beer, active vacations going diving and skiing, and have recently started volunteering with Coding Pirates teaching children and young people how to program and use various technologies.

EXPERIENCE

• Coding Pirates Lyngby Microsoft

Aug 2026 - Present

Volunteer supporting children and young people in learning coding and exploring technology through hands-on activities.

• Continia Software A/S

May 2022 - May 2023

Student Developer focusing on development, debugging, and Issue Resolution of Continia's Document Capture solution: A Business Central extension for automating Accounts Payable.

• Technical University of Denmark

Jan 2021 - May 2022

Student Assistant at the Office of Communication and Media. Responsible for updating the DTU website and managing material to new students.

• RetailTechLab, Science City Lyngby

Sep 2020 - Dec 2020

Intern with responsibility of finding and contacting retail-tech related startups for showcasing potential future technologies to be incorporated into the retail industry.

EDUCATION

• MSc in Software

Aalborg University (AAU), Copenhagen

• BSc in Software Technology

Technical University of Denmark (DTU), 2025

• Almen studentereksamen (STX)

Gammel Hellerup Gymnasium, 2018

TECHNICAL SKILLS

Programming & Paradigms: Python, Java, C#, C/C++, JavaScript/TypeScript, SQL, Object-Oriented Programming (OOP), RESTful, Test-Driven Development (TDD)

Software Engineering Practices: Agile, Version Control (Git), Unit Testing (e.g. PyTest, JUnit, Cucumber), Docker

Data & ML/DL: NumPy, scikit-learn, PyTorch, MLOps, n8n

UI/UX & Design: Figma prototyping, UX testing, User Story Mapping

RELEVANT COURSEWORK (the number in parentheses denotes received grade)

Software Engineering 1 (12), Database systems (12), Network security (12), Algorithms and Data Structures 1 (10), Computer systems (12), Operating Systems (12), UX design prototyping (12), Discrete Mathematics (10), Concurrent programming (12), Ethical Hacking (10).
